- Support

Florida Atlantic University (FAU), located in Boca Raton, Florida, is a rapidly growing, comprehensive public university with an enrollment of approximately 25,000 students. Student Health Services (SHS) at various campus locations cater to the physical well-being of the student population. All students are required to fill out an immunization form prior to attending classes on campus. The SHS must maintain these signed forms along with the attached documentation for seven years. SHS was mired in hundreds of thousands of paper documents, which occupied premium office space. It took valuable time and resources to search and retrieve the documents. FAU released an RFP to solicit a solution to this problem.

PowerVision proposed a solution based on its **DigitalVision** Document Management System to solve FAU's problems in a cost-effective manner, with proven and quantifiable Return on Investment. In a highly competitive field of 26 vendors, PowerVision scored the highest. Gordon Adams, the Chairman of the selection committee noted, "PowerVision presented a complete EDMS (Electronic Document Management System) that was extremely easy to use and learn."

FAU receives the immunization forms year-round, with the bulk of the load coming during the Fall and Spring admissions. Many forms have attachments in various sizes, shapes and colors. PowerVision took challenge of scanning and cataloging a backlog of over 400,000 documents into the **DigitalVision** system, that was specifically configured to suit FAU's needs. PowerVision's solution based on DigitalVision effectively manages the immunization records for FAU. Using High Speed scanners from Kodak and Adobe Capture software, PowerVision developed an efficient process flow to scan and catalog the documents. Within a month, PowerVision delivered the complete **DigitalVision** system with 25% of the documents into the system every week with a single mouse click. Now the system is accessed by SHS staff who save significant amount of time in accessing and retrieving immunization records and consent forms.

The **DigitalVision** system was deployed at FAU in October 2002. PowerVision will continue to scan and catalog documents for FAU as immunization records are submitted by new applicants. The system is securely deployed at the SHS in accordance with the HIPAA regulations for medical records privacy.
